Erlang

Joe Armstrong 著／榊原一矢 訳

Programming Erlang:
Software for a Concurrent World

Ohmsha

Japanese magazine article

- I've just started a monthly series on **Software Design** about Erlang/OTP and concurrent programming

Study groups

- Sapporo-beam (mostly Elixir activities)

- Riak Source Code Reading @ Tokyo

And many other occasional gatherings such as:

- Kabukiza Tech #3: Real World Erlang/OTP

Notable users

- Shiguredo: specialized in MQTT, WebRTC, and other advanced technologies

- Dwango's case study: massive video distribution system for non-PC terminals

- VOYAGE GROUP's case study: real-time bidding system

- LeoFS: distributed storage

- Basho Japan, and Riak / Riak CS users

Mirror site in Japan

- erlang-users.jp: providing a mirror site of Erlang/OTP distributions in Japan

Summary

- Erlang/OTP and Elixir has been gaining the popularity in Japan, slowly but surely

- More Japanese good documents and reference materials are still heavily in need (Japanese engineers have severe difficulties in reading/listening to English)

Sponsored advertisement

- If you have difficulties working with Japanese IT engineers, contact **Kenji Rikitake Professional Engineer's Office!**

- Projects done: English-to-Japanese web security document translation, HTML5+CSS3+jQuery web site design

- Interested in Erlang/OTP, FreeBSD, computer security, and the Internet industry
